

Mission:

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Ron DeSantis
Governor

Joseph A. Ladapo, MD, PhD
State Surgeon General

Vision: To be the **Healthiest State** in the Nation

Bamlanivimab-Etesevimab and REGEN-COV Monoclonal Antibody Treatments No Longer Authorized for Use in U.S.

January 24, 2022

On January 24, 2022, the U.S. Food and Drug Administration (FDA) reissued the emergency use authorizations (EUAs) for Eli Lilly's bamlanivimab-etesevimab (administered together) and Regeneron's REGEN-COV (casirivimab and imdevimab) monoclonal antibody treatments, which states these treatments are not authorized for use in any U.S. state, territory, or jurisdiction at this time. The full FDA press release can be found [here](#).

Corresponding revisions have been made to the authorized fact sheets for [bamlanivimab-etesevimab](#) and [REGEN-COV](#). These fact sheets are available of the [FDA's website](#).

As a result of the reissued EUAs, health care practitioners in Florida are no longer authorized to administer these monoclonal antibody treatments to patients, effective immediately. Further, all state-supported monoclonal antibody sites are closed effective immediately due to the abrupt change from the FDA.

Resources for emerging treatments can be found at [HealthierYouFL.org](#). Pharmacies that have received allocations of antiviral treatments can be found at [FloridaHealthCOVID19.gov](#).

The full Florida Department of Health press release can be found [here](#).
